

MAEAP Water Monitoring

PROGRAM COORDINATOR: Robert Pigg | 517-284-5611 | piggr@michigan.gov

The Water Monitoring Program is the only program in Michigan routinely testing water quality in privately-owned (non-community) water wells. Samples are analyzed for pesticides, volatile organic compounds, and nitrate contamination. Well owners with results indicating a water quality problem are provided with information on risks and steps to take to verify water quality safety. If a groundwater contamination problem is identified, the program works with local landowners to determine the extent and severity of the problem. In some cases, financial assistance can be provided for alternate water supplies.

IMPACT FOR MICHIGAN:

Pesticide contamination of groundwater has been detected at 104 of 4,764 sites sampled by the program in Michigan, or 2.2 percent of the sites sampled. Elevated nitrate levels have been identified at 17 percent of private sites tested for nitrate, and half of these contain nitrates above public drinking water standards. Contaminant concentrations in groundwater indicate the need for improving pesticide and fertilizer management by both homeowners and agriculture.

FY18 ACCOMPLISHMENTS:

- Continued work on a privately funded multi-year research study evaluating the impact of the newly-registered pesticide, isoxaflutole, which included hosting a project update.
- Worked with MDARD and MDEQ colleagues to determine locations for surface water monitoring of nutrient loads in several Michigan tributaries to the Western Lake Erie Basin
- Worked with the newly-formed multi agency Michigan Water Quality Workgroup

MEASURING SUCCESS:

Metric	FY14	FY15	FY16	FY17	FY18
MDEQ or MDARD Analytical Lab Analysis					
Wells Sampled	99	130	84	94	114
Pesticide Detections	2	1	1	3	1
Pesticide > Drinking Water Standards	0	0	0	0	0
Nitrate Elevated between 5 and 10 ppm	5	8	5	7	8
Nitrate over Drinking Water Standard of 10 ppm	9	8	5	8	4
Screening with Test Strips					
Water Screenings	575	707	932	567	825
Nitrate Elevated between 5 and 10 ppm	44	53	44	33	69
Nitrate over Drinking Water Standard of 10 ppm	58	46	67	47	54
Households Notified of Drinking Water Risks	118	116	122	98	136

FY19 PROGRAM GOALS:

- Conduct at least one online and one in-person training in well monitoring procedures.
- Work with state colleagues and supervisors, university researchers, and commodity groups to evaluate monitoring for neonicotinoid pesticides in Michigan groundwater and surface water.

KEY STAKEHOLDERS:

- Domestic well owners and users
- Pesticide and nitrogen fertilizer users
- Pesticide registrants
- Local health departments
- State and federal partner agencies

LEGAL AUTHORITY:

- Natural Resources and Environmental Protection Act, Public Act 451 of 1994, Part 87 (Groundwater and Freshwater Protection), as amended
